

## Want to change your automated weekly reminder email?

**You can change the email address to which the weekly reminders are automatically sent (or turn off these reminders).**

Under the Profile menu tab above, select ***Edit Account Profile*** (this is the contact info you entered on registration and is required and used only by the administrator of this website for confirming orders and payments). The email address you provide here is the one used to send you information related to your orders, and a reminder each Sunday of what you ordered for your child(ren) for the following week. This contact info is NOT shared with other families.

NOTE: We used to have lunches every week. The automated reminder will still come out weekly even though lunches are now monthly. While we apologize if this is a hassle, there is no way to configure it differently, and on the positive side it will help you keep track of when the lunches are (and aren't).
